

Dictus Flex

Improves the mobility of users with foot drop.

The Dictus Band has helped thousands of users who suffer with foot drop to live a normal everyday life again. The band lifts the foot immediately after toe off, which reduces the risk of tripping on doorsteps, the edges of rugs or cobbles. This enables the user to move around unhindered again, enjoy walks and not have to worry about accidents.

The Dictus Band is a discreet aid that is suitable for use with shoes with laces. It consists of an ankle strap, a rubber band and an attachment that is fitted to the shoe.

The ankle strap is secured easily around the leg with velcro and sits comfortably in place all day. The strap is made from real leather, which becomes softer and more comfortable each time you wear it. The ankle strap is connected to the shoe attachment by a rubber band. Dictus Flex features a rubber band with two integrated plates. The Flex rubber band firmly supports the foot and can be easily tightened and adjusted as required.

Read more and watch an instructional video on our website.

Benefits:

- Gives the user confidence and freedom by reducing the risk of tripping and falling.
- Made from durable leather, which gets softer each time you wear it.
- Flex rubber band that can be tightened and adjusted.
- A discreet aid that is suitable for use with most types of shoes.
- Available for both adults and children.
